Asset Management

*Metech International - an ISO 9001:2000, ISO 14001:2004
and IAER (International Association of Electronics Recyclers) Certified Electronics Recycler®*

Asset Management Services

Clients who demand traceable, documented and responsible materials disposition, come to Metech International for their asset management services. Whether you have obsolete inventory, nonconforming products or end of life electronics, Metech will develop a program specific to your needs.

We offer a wide range of processing alternatives to meet your objectives. Metech offers certified destruction, data removal, disassembly of goods, component or part recovery, equipment refurbishing and resale, and environmentally correct recycling

of all materials. These services, coupled with our size and experience provides you with peace of mind. You can be assured that your material is handled responsibly - nothing will go to a landfill or for disposal in developing countries.

By using Metech, you avoid the risks of environmental, informational and technological exposure. Proper processing, risk mitigation, material tracking - we call it Accountable Resource Management® (ARM®).

For your protection, be ARM'ed by Metech! We not only say it, we do it!

Highlights of Service Offering:

- Certified destruction of equipment and material
- Precious metal recovery from electronic fractions
- Resale of components and equipment
- Web-site based take-back programs
- Base metal recovery and recycling
