Component Resale

*Metech International - an ISO 9001:2000, ISO 14001:2004
and IAER (International Association of Electronics Recyclers) Certified Electronics Recycler®*

Component Remarketing

As part of Metech International's commitment to providing the widest array of integrated recycling solutions available to our clients, we offer Remarketing Services for excess and obsolete electronic components.

Our Remarketing Services help offset recycling costs by returning value to you for the items you no longer want. You can be confident that your proprietary items will not end up on "gray markets" and if certified destruction is requested - it happens.

Our policy of "resale in writing" helps assure both parties that we will only remarket the items you want sold.

We control the disposition of your inventory, preventing "market saturation" and "bidding wars" to return optimum value.

We market your goods to a wide range of industries throughout the world. Our 35 years experience is what allows us to deliver this service, value, advice and expertise in an "all inclusive" package.

Highlights of Service Offering:

- Strategic Alliance with Dan-Mar Components - the most reputable remarketing company in North America
- Outright buy and Consignment options
- Customized programs - built to match your needs
- Expertise on distinguishing proprietary components that should be scrapped from marketable components
- Real-time, internet accessible "on line inventory" - track and manage your consignment inventories
- Remarketing of integrated circuits, semiconductors, passive components, connectors, crystals, mill-spec electronics, capital equipment, telecommunication systems and devices
- Metech International, an asset management company that is ISO 9001 and ISO 14001 registered and an IAER Certified Electronics Recycler®
