Fact Sheet

Corporate Compliance

Metech International - an ISO 9001:2000, ISO 14001 and IAER (International Association of Electronics Recyclers) Certified Company

Metech Corporate Compliance

Continued growth and prosperity are possible only if our customers, suppliers and fellow employees maintain their trust in our integrity.

This requires continuous commitment to the highest standards of business conduct and a reaffirmation of the importance of those standards.

While we strive to advance the financial interests of Metech, we must not be indifferent to how these objectives are achieved. Simply put, success cannot be achieved at the expense of integrity or violations of law.

Benefits of Program:

- Written assurance to our clients that local, state and federal regulations are followed.
- Documented proof of our commitment to "doing the right thing" - legally, morally, and environmentally.
- Formalized evidence that our Company's conduct and reputation matters to us.
- A policy built to protect our clients' financial assets - illegal or unethical conduct is not tolerated at any level in the company.
- A full version of Metech's written Corporate Compliance Policy is available upon request.
- Metech International is an ISO 9001, ISO 14001 and IAER Certified recycler and asset management company

Unethical conduct and violations of law are neither in the individual's nor the Company's best interests.

There is no commercial objective that is more important than obeying the laws and regulations applicable to the Company's business activities.

As evidence of our commitment to this concept, we have a written and strictly enforced Corporate Compliance Program. This program serves as the foundation for our business conduct - both with our clients and our co-workers.
