

## Service Bulletin

# Equipment Resale

*Metech International - an ISO 9001:2000, ISO 14001  
and IAER (International Association of Electronics Recyclers) Certified Company*

## Electronic Equipment Resale

At Metech, we know about maximizing the value and minimizing the cost of recycling your electronic office and test equipment.

As part of our integrated recycling services offering, we've set up a program to reuse and resell your equipment, to recover a higher value from your material. Maximizing value is one of the cornerstones of Metech's Accountable Resource Management® (ARM®) protocol.

Our strategic alliances allow us to offer refurbishment and remarketing of computers, printers, monitors,

peripherals, and electronic test equipment.

By using Internet auctions, consumer outlet stores and web-based marketing, we are successful in turning old equipment into dollars.

To complement this service we also offer secure data removal, certified destruction and 100% no-landfill recycling of electronics.

These services are supported and coordinated using Metech global logistics, and account tracking is done with Metech's exclusive ARM® software.

### Highlights of Service Offering:

- Strategic Alliances in place to resale niche items and handle special requirements
- Refurbishment and resale of used electronic equipment, to recover a higher value for your material
- Many different methods of selling your equipment to maximize your return and minimize your recycling costs
- Complimented by Metech's electronic recycling protocols and secure data removal services
- "Your site" pick up, inventory, data cleansing and removal services for large quantities of equipment
- Accurate and professional equipment appraisal
- Metech International is an ISO 9001, ISO 14001 and IAER Certified recycler and asset management company
